

cwg Minerals

THE BENEFITS

Mineral feeding advice

Free-access minerals are water-proofed and flavoured to ensure immediate acceptance and consistent intakes.

Place free-access minerals in self draining containers away from the water source.

Allow one feeding point per 25 cattle or 50 sheep.

In-feed minerals can be top dressed on forage and feeds or included at ½ to 1 bag per tonne in home mixes.

Recommended feeding rates

Dairy cows 150g/day

Suckler cows 125g/day

Beef cattle and young stock 100g/day

Calves 50g/day

Ewes 30g/day

Lambs 15g/day

(Levels may need adjustment if other dietary ingredients supply added minerals)

cwg Minerals range

cwg Minerals Range

Our minerals are nutritional supplements formulated to improve the value of home grown forages and feeds for cattle and sheep.

This new cwg range of dust-free minerals has been carefully formulated to enhance the value of home grown forages, pasture and feeds for cattle and sheep. Each formulation contains selected highly available raw materials and micro-nutrients to help you get the best performance from your stock. Designed for in-feed or free-access supplementation to save you time these minerals are proven to provide optimum levels of essential minerals, trace elements and vitamins to help balance rations and improve fertility, health and all-round performance.

Product range: Free-Access (FA) and In-Feed (IF). All 20kg bags.

GP Cattle (FA) & Eco GP Cattle (IF)

- High calcium formulation ideal for supplementing pasture, forages and cereal based rations
- Rich levels of trace elements including protected copper for improved absorption
- Do not feed to sheep

GP Sheep (FA) & GP Eco Sheep (IF)

- High calcium formulation ideal for supplementing pasture, forages and cereal based rations
- Rich levels of cobalt and iodine and protected zinc for better health and thrive
- Very high vitamin E for easier lambing and extra vigour
- Added B vitamins useful at pasture and with pre-ruminating lambs

Dairy High Phos (FA) & Eco Dairy High Phos (IF)

- Extra phosphorus to improve appetite and reproductive performance in cows and dairy heifers
- Use in early lactation with high forage and straights based rations
- High levels of trace elements and Vitamin E to improve health and immunity
- Do not feed to sheep

Dry Cow (FA)

- Correct ratios of major and trace elements for the pre-calving period
- Includes protected zinc & copper for health and fertility
- Ultra - high vitamin E for improved calf vigour and immunity
- Introduce from drying off until calving
- Do not feed to sheep

Extra Mag Cattle (FA) & Eco Extra Mag Cattle (IF)

- Extra magnesium for protection against grass staggers
- Use during spring turnout and again in autumn with grazing dairy and beef cows at risk from hypomagnesaemia
- FA version contains protected zinc for hoof health
- Do not feed to sheep

Extra Mag Sheep (FA) & Eco Extra Mag Sheep (IF)

- Extra magnesium for protection against grass staggers
- Ideal for lactating ewes at turnout
- Added B vitamins useful at pasture
- Do not feed to housed tup lambs

Suckler Cow (FA) & Eco Suckler Cow (IF)

- Specially formulated to enhance the performance of beef cows and calves
- High levels of trace elements and vitamins to eliminate deficiencies in pasture and forages
- Feed all year round for best results
- Do not feed to sheep

Intensive Beef (IF)

- Special formulation for cereal fed beef cattle on ad lib systems
- Include in ration at one bag per tonne in ad lib systems
- High calcium and nil magnesium for optimum health and growth
- Do not feed to sheep

cwg *Buckets*

THE BENEFITS

- Nine products formulated to provide the recommended daily allowance of essential minerals and vitamins
- Excellent palatability and easy to use
- Specialist supplements available for the key periods in the annual livestock cycle
- 24 hours access provides little and often supplementation for the whole herd/flock
- Allow 1 bucket or 100kg tub per 15 cattle or 50 sheep.

cwg *Bucket range*

cwg Bucket Range

Our buckets are nutritional supplements formulated to improve the value of home grown forages and feeds for cattle and sheep.

The new cwg range of mineral and feed buckets has been carefully formulated to enhance the value of home grown forages, pasture and feeds for cattle and sheep. Each bucket contains selected ingredients and micro-nutrients to help you get the best performance from your stock. Designed for free-access supplementation to save you time these products are proven to provide optimum levels of essential minerals, trace elements and vitamins and select feed ingredients to improve fertility, health and all-round performance.

Flushing 18kg

- High energy supplement for cattle and sheep at grass and fed high forage rations
- Contains 14% protein from quality rumen bypass ingredients for growth and improved milk output
- Added fish oil for improved fertility and lamb vigour
- High specifications of minerals, trace elements and vitamins
- Also ideal for finishing lambs at grass and on root/fodder crops

Intakes: sheep up to 200g/day, cattle up to 400g/day

Cattle Plus Garlic 20kg

- Mineral and vitamin supplement to eliminate deficiencies in pasture and forages
- Added garlic oil to help repel nuisance insects
- Withdrawal necessary: 7 days for lactating cows, 21 days for meat animals
- Use throughout the summer grazing period
- Do not feed to sheep

Intakes: mature cows 175g/day, young stock 125g/day

Cattle High Magnesium 20kg & 100kg

- 15% magnesium supplement to help prevent grass staggers in cows
- Added sodium to improve magnesium absorption
- Palatable and readily accepted by cows even on lush grazing
- Do not feed to sheep

Intake: cows 150g/day

Pre Tup 20kg

- 8% phosphorus bucket with high levels of trace elements to help improve fertility in breeding ewes and rams
- Use from 2 weeks pre-tupping for 10 weeks for best results

Intake: up to 30g/day

High Magnesium (cattle and sheep) 20kg & 100kg

- Dual purpose supplement to help prevent grass staggers in cows and ewes
- Added sodium to improve magnesium absorption
- Palatable and readily accepted by stock even on lush grazing

Intakes: cows up to 150g/day, ewes up to 60g/day

Dry Cow 20kg

- Calving preparation that supplies optimum ratios of minerals, trace elements and high vitamin E
- Introduce from the start of the dry period through to calving
- Use as an aid to preventing milk fever, ease of calving and breeding back after calving
- Do not feed to sheep

Intake: dairy and suckler cows 175g/day

High Phosphorus 20kg

- A special 8% phosphorus bucket for cattle to help enhance intake and reproductive performance
- Ideal pre-bulling and on diets requiring additional phosphorus such as brassicas
- High levels of trace elements and vitamins
- Do not feed to sheep

Intakes: cows 175g/day, young stock 125g/day

General Purpose (cattle and sheep) 20kg & 100kg

- Helps to eliminate mineral and vitamin deficiencies in pasture and forages
- Use all year round with stock for better health and performance
- Ideal for dairy cows, suckler cows, young stock and breeding ewes

Intakes: mature cattle 175g/day, young stock 125g/day, sheep 60g/day

Cattle plus Copper 20kg

- A special formulation with extra copper for cattle only
- Additional copper is important for reproductive performance especially in areas where forages are high in iron, molybdenum or sulphur
- Ideal for bulling heifers and cows where poor fertility is a problem
- Do not feed to sheep

Intakes: cows 175g/day, young stock 125g/day

Note: All products available in 100kg tubs as special order
