

PRODUCT DATA SHEET

GROWERS CALF MILK + Available in 20kg packs

ANALYSIS OF FEED

Oil	17.0 %	Vitamin A	(iu/kg)	25,000
Protein	22.0 %	Vitamin D3	(iu/kg)	6,000
Fibre	0.0 %	Vitamin E	(iu/kg)	250
Ash	7.5 %	Selenium	(mg/kg)	0.4
		Copper	(mg/kg)	10

RAW MATERIALS (in descending order of inclusion)

Whey Protein	L Lysine Monohydrochloride
Blended Vegetable Oil	DL Methionine
Hydrolysed Wheat Gluten	Gardion
Calcium Carbonate	Citric Acid
Vitamins and Minerals	Antioxidant BHT E321

Growers Calf Milk + is a premium quality concentrated calf milk replacer. The unique processing system used in its manufacture retains the valuable immunoglobulins naturally present in milk. Immunoglobulins can play an important role in protecting the calf against intestinal diseases for several weeks after birth. Gardion, containing the plant extract, alliin, is also included as alliin helps reduce the build up of pathogenic bacteria without having any negative effects on the beneficial lactic acid bacteria. These features, and the presence of organic acids, all help to support trouble-free calf rearing.

Growers Calf Milk + is designed for both once and twice a day bucket feeding and is also suitable for some machines. Always ensure that adequate colostrum (at least 3 litres) has been consumed, ideally within 6 hours of birth.

Growers Coarse Calf Mix or Growers Calf Starter pellets should be introduced at 4 days of age with clean straw and a continual supply of clean, fresh water.

Calves should be moved on to Growers rearing nuts at 8 weeks of age. Weaning should take place when animals are eating a minimum of 0.75kg (1.5lbs) per head per day for 3 consecutive days, preferably 1kg (2lbs) per head per day.
