Vitamin E	(mg/Kg)	500	Zinc	(mg/Kg)	5,000
Copper	(mg/Kg)	2,000	Iodine	(mg/Kg)	200
Selenium	(mg/Kg)	25			

RAW MATERIALS

Calcium	22.25%
Phosphorus	2%
Sodium	9.83%
Magnesium	5%
Chloride	15.18%
Salt	25%

This is a high specification mineral supplement containing palatable ingredients for cattle. Including protected copper, this product has been specifically formulated to maximise bio-availability and combat possible copper deficiency caused by high molybdenum and iron levels commonly found in fresh grass and grass silage. Copper is also a key element in enzyme reaction and energy metabolism, deficiency of which can prevent cows from holding to service.

Growers general purpose cattle minerals should be available with a continual supply of clean, fresh water.

DIRECTIONS FOR USE:

Cattle should be fed Growers mineral at the following rates:

Growing Cattle: 50 . 100 grams/head/day

Dairy Cattle: 100 . 150 grams/head/day

Analysis and raw material list are correct at time of printing but may change without notice.
